Cylinder Repairs & Services:

Hydraulic cylinder repair refers to the process of diagnosis, disassembly, component replacement or repair and reassembly. Hydraulic cylinders are widely used across a range of applications, such as excavators, tractors and other equipment. Common issues encountered are leaking seals, bent or damaged rods or corrosion. A custom-built cylinder assessment and repair service provides customers with a cost-effective alternative to total replacement.

Our Solutions:

Tipper/Custom Cylinders

Fluiconnecto stocks a large range of side tipper, door and lid cylinders to suit most trailer brands, with door cylinders available in both external or internal over-centre valve options.

Phasing Cylinders

Our Phasing Cylinder range is manufactured with an internal mechanism that delivers the optimal lift for your application with minimal internal wear and low cylinder creep.

Agriculture Cylinders

Our general-purpose Agricultural Cylinders are available in a wide range of sizes to meet every farming application need.

Industrial Cylinders

Our heavy-duty Industrial Cylinders are designed for the most rugged applications and suitable for single and double acting operation.
