Unparalleled Defence Specialists

Fluiconnecto's has established a robust foundation deeply rooted in both production and the supply of defence equipment, technologies, and services to fulfill national security requirements. Through a seamless integration of volume manufacturing for general industry and the unique demands of defence, Fluiconnecto has proven its capability to harmonise design intricacies and stringent quality assurance.

Our commitment to excellence is exemplified by its provision of specialised test equipment, crucial for crafting sophisticated hydraulic hose assemblies that withstand the rigorous demands of defence force applications and environments.

Services

- Hydraulic Hose Assemblies
- Industrial Hose Assemblies
- Formed Tube Assemblies
- NATA Testing

Third-Party Approvals & Testing

- Lloyd's Register Certified
- MED (Marine Equipment Directive)
- RINA (Registro Italiano Navale)
- ABS (American Bureau of Shipping)
- BV (Bureau Veritas)
- DNV-GL (Det Norske Veritas – Germanischer Lloyd)
- NATA (National Association of Testing Authorities)

We Bring The Manufacturers To Your Doorstep

Our Manufacturing Division is focused on achieving excellence in the design and manufacture of fluid conveyance solutions, components, and workshop equipment.

We bring the manufacturers to your doorstep: Manuli Hydraulics and Ryco Hydraulics. In this way, we maintain full control over the entire manufacturing process of hydraulic lines and components, ensuring high-quality, reliable products
